

## MOTHERBOARD AND CPU THEORY

1. Draw a labeled diagram of an ATX motherboard and mark at least 8 different slots and ports (such as RAM slots, PCIe slots, SATA ports, USB headers, CPU socket, power connector, etc.).

Ans.

## MOTHERBOARD AND CPU THEORY

**2. Research and list 3 popular CPU socket types (for example: LGA1151, AM4, LGA1200) and name one compatible CPU model for each.**

Ans.

1. **LGA1151:**

LGA1151 is a CPU socket mainly used by Intel processors. It supports many 8th and 9th generation Intel Core processors. One compatible CPU model is **Intel Core i7-9700**.

2. **AM4:**

AM4 is a popular CPU socket developed by AMD. It is used with many AMD Ryzen processors. One compatible CPU model is **AMD Ryzen 5 5600**. It is commonly used in desktop computers for general work, programming, gaming, and other applications.

3. **LGA1200:**

LGA1200 is a CPU socket used for Intel 10th and 11th generation desktop processors. One compatible CPU model is **Intel Core i5-10400**. It provides good performance for everyday computer tasks and other applications.

## MOTHERBOARD AND CPU THEORY

**3.Explain in your own words the primary functions of the CPU and the chipset on a motherboard, and describe how they work together when you open a music app like Spotify .**

Ans.

**CPU:**

CPU is the main part of the computer.

It processes the instructions given by the user.

It performs calculations and other computer tasks.

It helps programs to work properly.

**Chipset:**

Chipset helps the CPU to communicate with other parts.

It connects the CPU with RAM, storage and other devices.

It helps in moving data between different hardware parts.

**Example of Spotify:**

First, we click on the Spotify app.

CPU gets the instruction and starts the app.

The chipset helps to get the app data from storage.

The data is loaded into RAM.

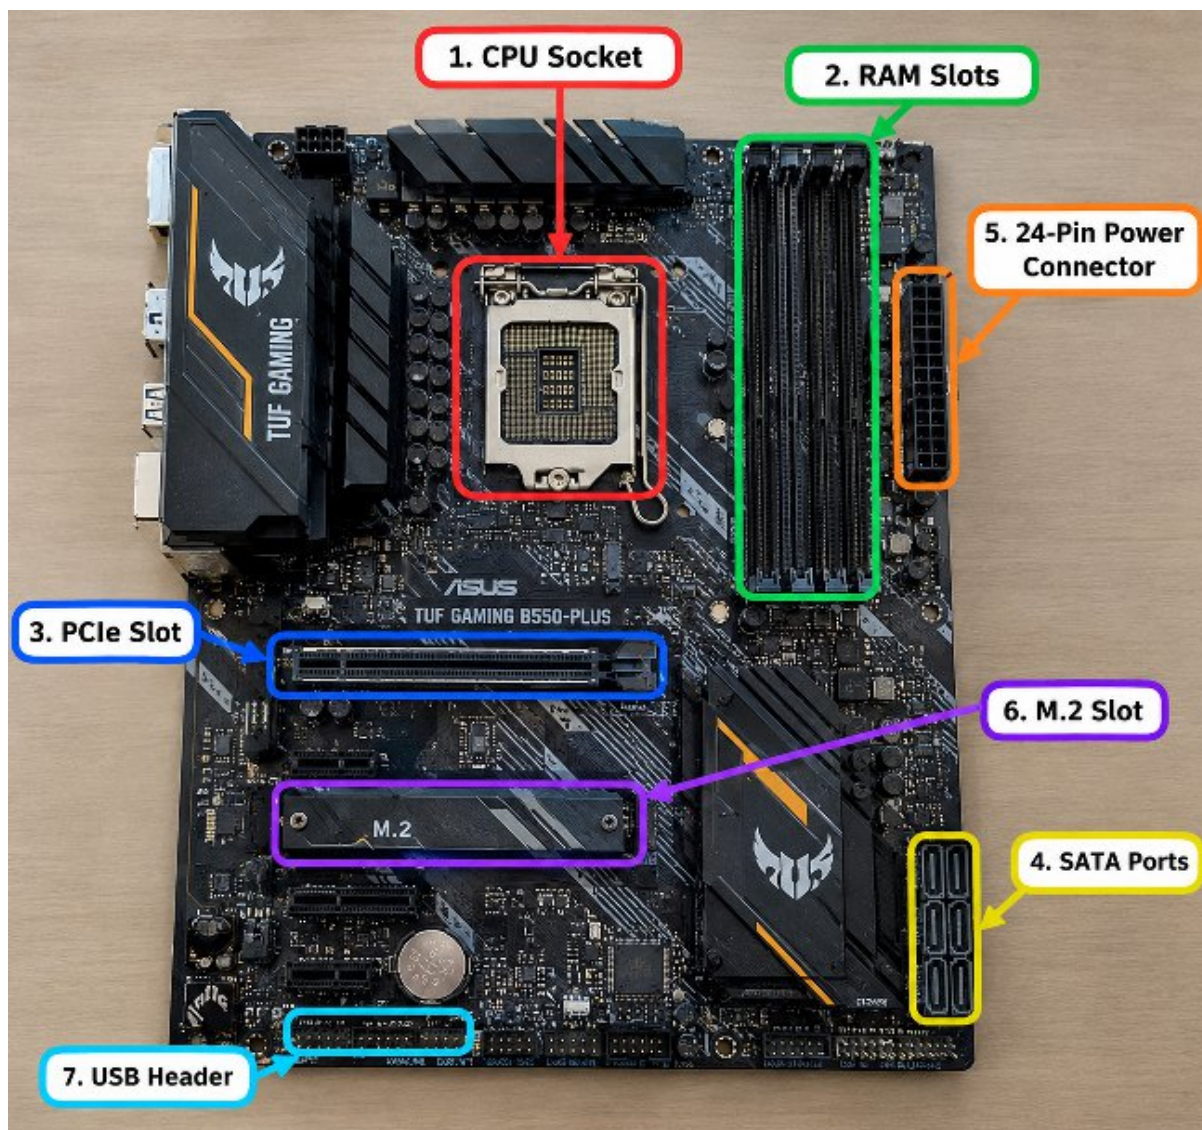

CPU processes the data and Spotify starts working.

Then we can select and play our favourite song.

## MOTHERBOARD AND CPU THEORY

4. Find a clear photo of a real motherboard (from the internet or your own device), and identify at least 5 different ports or slots by circling them and labeling each one.

Ans.
