

OVERVIEW OF PERIPHERALS THEORY

1.Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Ans.

Device	Type	Use
Printer	Inkjet Printer	Printing college assignments
Printer	Laser Printer	Printing office documents
Printer	Thermal Printer	Printing shop bills
Scanner	Flatbed Scanner	Scanning documents and photos
Scanner	Sheet-fed Scanner	Scanning many pages
Webcam	USB Webcam	Online classes and meetings
Webcam	Built-in Webcam	Video calling on laptop

OVERVIEW OF PERIPHERALS THEORY

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

Ans.

1. **USB Connection:** Connect the printer to the laptop or PC using a USB cable.
2. **Wi-Fi Connection:** Connect the printer and laptop/PC to the same Wi-Fi network.
3. **Bluetooth Connection:** Connect the printer to the laptop/PC wirelessly using Bluetooth.

OVERVIEW OF PERIPHERALS THEORY

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage

Ans.

Connection Interface	Advantage	Disadvantage
USB	1. Easy to connect and use. 2. Provides fast data transfer. 3. Works with most computers and laptops. 4. Gives a stable connection.	1. Requires a physical cable. 2. Cable length is limited. 3. USB ports can get damaged with frequent use. 4. Usually connects one device at a time.
Wi-Fi	1. Provides a wireless connection. 2. Multiple devices can connect to the same printer. 3. No cable is required between the computer and device. 4. Useful for devices placed away from the computer..	1. Requires a Wi-Fi network. 2. Setup can be difficult for some users. 3. Connection may become slow if the network is busy. 4. It may disconnect when the Wi-Fi signal is weak.
Bluetooth	1. Wireless and easy to connect. 2. Does not require an internet connection. 3. Uses less power for short-distance connections. 4. Useful for connecting compatible devices nearby.	1. Has a limited operating range. 2. Data transfer speed is lower than USB. 3. Not all printers, scanners, or webcams support Bluetooth. 4. Connection can be affected by nearby wireless devices.

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Ans.

Device: Printer

Connection Method: USB Cable

Step 1 : Turn on the printer and computer.

Step 2 : Connect the USB cable from the printer to the computer.

Step 3 : Wait for the computer to detect the printer.

Step 4 : Open Settings → Bluetooth & Devices → Printers & Scanners.

Step 4 : Click Add Device and select the printer.

Step 5 : Install the printer driver if required.

Step 6 : Print a test page to check the connection.
