

1. Open your own laptop or desktop (or use an online PC hardware simulator if you don't have access to a real system) and identify the GPU model installed. Write down the GPU's brand, model number, and whether it is integrated or dedicated.

Ans.

- Laptop: ASUS Vivobook 16
- GPU Brand: Intel
- GPU Model: Intel UHD Graphics
- Type: Integrated GPU
- Use: It is used for displaying graphics, watching videos, running normal applications, and playing light games.

2. Take a clear photo or screenshot of the cooling system (fan, heatsink, or liquid cooling setup) inside your PC or from a PC hardware simulator. Label the main cooling components and briefly describe their function.

Ans.

- **CPU Fan:** Removes hot air from the CPU area.
- **Heat Pipe:** Transfers heat from the CPU to the heatsink.
- **Heatsink:** Dissipates the heat into the air.
- **Thermal Paste:** Improves heat transfer between the CPU and heatsink.

3.Create a comparison table listing at least 3 differences between air cooling and liquid cooling systems for GPUs, including factors like cost, efficiency, and maintenance.

Ans.

Feature	Air Cooling	Liquid Cooling
Cooling Method		Uses liquid/coolant and radiator
cost	Generally cheaper	Generally more expensive
efficiency	Good for normal use and gaming	Better for high-performance GPUs
maintenance	Easy; mainly cleaning dust	More maintenance and checking for leaks
noise		Usually quieter, depending on the setup

4. Imagine you are building a gaming PC for streaming IPL matches and playing graphics-heavy games. Choose between air cooling and liquid cooling for your GPU, and justify your choice in 3-4 sentences based on your research.

Ans.

- I would choose liquid cooling for the GPU.
- It provides efficient heat dissipation during long gaming and streaming sessions, helping maintain stable performance.
- Although liquid cooling is more expensive and requires more maintenance than air cooling, it is suitable for a high-performance gaming PC.
- For a lower-budget build, however, a good air-cooling system would also be sufficient.
